

MSMWHS217 Gas Test Atmospheres and RIIWH5202D Enter and Work in Confined Spaces

COURSE DESCRIPTION

The aim of this training program is to provide the student with the underpinning skills and knowledge to:

- Plan and prepare for entry into a confined space
- Plan and prepare for gas testing
- Carrying out atmospheric testing
- Carry out work in a confined space
- Safely exit a confined space and clean up
- Maintain gas atmospheric testing equipment

PERSONS WHO WOULD BENEFIT FROM THIS COURSE

This training program is appropriate for those working in the civil and general construction, mining and stevedoring industries who are required to hold certification for RIIWH5202D Enter and work in confined spaces and MSMWHS217 Gas test atmospheres as part of their work including working in confined spaces. These workers may include those:

- Where their job role involves or may involve some work in confined spaces and includes entering a confined space and monitoring atmospheres before and during the work
- Where individuals whose role encompasses safety management on a worksite
- Whose role encompasses responding to site emergencies and incident response

The general public seeking certification to undertake this training program are also welcome to enrol. However, Driveway Training primarily offers this training program to corporate clients. If you are an individual seeking to complete this training program, contact us to discuss how we can help you.

COURSES ENTRY REQUIREMENTS

There are no entry requirements for this training program. However, students must provide a copy of their current driver's licence.

COURSE CONTENT

Students enrolling in this training program will develop the skills and knowledge to:

- Identify, access and apply legislative, organisational and site requirements and procedures
- Identify, and apply operational, maintenance and basic diagnostic procedures
- Handle materials safely
- Apply site and equipment safety requirements
- Use atmospheric monitoring devices
- Identify and confirm the need for conducting atmospheric testing
- Selecting and preparing atmospheric testing devices
- Identify and apply procedures for the safe operation of atmospheric testing devices
- Accurately interpret and record readings
- Identify hazardous atmospheres
- Identify and confidently use correct equipment to carry out work in confined spaces work
- Follow procedures to enter, carry out work and exit confined spaces safely
- Understand the limitations present with breathing apparatus
- Carry out site isolation and site control responsibilities
- Interpret and apply JSA's and safe work method statements
- Follow procedures to assess risk and implement hazard controls
- Identify air contaminants and toxic gases
- Access, interpret and follows safety data sheets
- Follow quality requirements

COURSE STRUCTURE & COURSE DURATION

This training program is delivered over a nominal duration of 10 hours.

The training program is delivered via a combination of formal face to face training and practical skills training.

The training program uses the workplace facilities, resources and equipment normally used in the workplace and that the student is familiar with.

Following the completion of all theory and practical training, students will complete a series of assessments including:

- Written knowledge assessment
- Practical skills assessment

Driveway Training customises this course in consultation with workplaces and employers to ensure that it is structured so as not to negatively impact their normal operations.

WHAT IS PROVIDED BY DRIVEWAY TRAINING?

Driveway Training will supply all learning and assessment resources necessary to provide the training services.

Access to physical resources and equipment will be provided by the employer.

Students must provide all the necessary PPE including:

- Head protection
- Hearing protection
- Eye protection
- Work boots
- Hi vis clothing

No PPE – No training

AWARD

Upon completion of this training program, students will receive a Statement of Attainment for RIIWHS202D Enter and work in confined spaces and a Statement of Attainment for MSMWHS217 Gas test atmospheres.
