

UETDRRF06

Perform rescue from a live LV panel

COURSE DESCRIPTION

This Competency Standard Unit covers the performance of rescue procedures from live Low Voltage (LV) apparatus, not including overhead lines and underground cables in the work place. It specifies the mandatory requirements of rescue from a live LV panel and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

PERSONS WHO WOULD BENEFIT FROM THIS COURSE

This unit is appropriate for those working in the electrical industry or for persons who may need to rescue anyone as part of their job description at worksites within:

- Coal mining
- Extractive industries
- Metalliferous mining
- Those who are required to provide an emergency first aid response in a workplace
- General public
